

COMPLETE ENGINEERED SYSTEMS FOR GROUNDWATER AND SURFACE WATER TREATMENT

ADI professionals offer a full range of water treatment solutions and design capabilities. We provide research, design, construction and operations of water supply systems for private, municipal or industrial use. ADI's team of engineers, scientists and technicians implement innovative water treatment solutions to clients around the world.

Surface Water Treatment

ADI has the expertise and capability to assist you in the treatment of water from surface sources, including intake design, selection of equipment, bench scale laboratory testing and on-site pilot testing. We specialize in pH adjustment/neutralization and removal of TOC, Giardia, Cryptosporidium, colour and turbidity.

Groundwater Supply

ADI has developed special expertise in the investigation, testing, development, extraction and treatment of groundwater supplies. We are a world leader in arsenic removal technology, having systems in place on four continents. We offer design-build systems complete with supply, installation, operator training and fully automated systems with remote data acquisition and monitoring.

Watershed Management

Our hydrologists, geologists and hydrogeologists support our team of water treatment engineers on watershed protection and management. We conduct surface and groundwater modeling, contaminant plume investigation and provide advice on watershed management practices.

Transmission, Storage and Distribution

ADI has worked with municipalities, First Nations, and industrial clients to design transmission, storage and distribution systems. ADI uses state of the art computer modeling to determine piping sizes, storage requirements and water characteristics.

OUR MISSION:

Success through
satisfied customers

Engineered Solutions for Government and Industry

Industry and governments alike are seeking new and innovative ways to source, test, treat, conserve, and protect drinking water. ADI has over 50 years of experience in engineering services including potable water sourcing, treatment, storage and distribution. Our technologies have provided clients with cost effective solutions to their water challenges, whether they be simple or complex.

The ADI team of professionals can provide a full range of water treatment design capabilities, including: studies and reports, process selection, design, drawings and specifications, site surveys, contract administration and construction inspection.

ADI can help you manage your overall project costs, provide after-care attention and assist in achieving your long-term objectives.

ADI LIMITED

ADI Limited provides consulting engineering, project management, environmental management and architectural services throughout Atlantic Canada and New England. Founded in 1945, we have grown to 200 professionals and technicians at nine offices across the region. We deliver innovative and cost-effective solutions to meet our customer's needs using our registered ISO 9001 quality management system.
