

ADI Limited welcomes award-winning urban planner and transportation engineer to Saint John

SAINT JOHN, NB (September 2, 2009) – ADI Limited, a consulting engineering firm with planning and architectural services, announced that Brian L. White, MCIP, RPP, has joined the Saint John office of ADI as a municipal planner, bringing 20 years of experience to its community planning and land development team.

Brian comes to Saint John from Halifax, Nova Scotia where he has worked in both the public and private sectors. Brian's career includes projects in urban and rural settings throughout Atlantic Canada involving municipal councils, committees, non-profits and developers. His professional commitment to meaningful public and stakeholder consultation during the planning process has earned him a national award for planning excellence.

Peter E. Allaby, M.A.Sc., P.Eng., a transportation engineer, is now part of the Saint John team as well. Peter's experience includes a wide variety of transportation planning and design projects across Canada and internationally. He has recently completed several traffic impact studies for major developments throughout Saint John, as well as operational studies involving Union Street and Rothesay Avenue.

Both Brian and Peter have purchased homes and relocated their families to Greater Saint John.

ADI's expanded office, under the leadership of Jean-Philippe Foisy, AANB, OAQ, has worked on a number of high profile projects in the greater Saint John area. Recent projects include the Town of Rothesay Recreation Master Plan, the innovative, colourful design for a parking garage as part of the Peel Plaza development, the Neonatal Unit at the Saint John Regional Hospital, redevelopment of the Crescent Valley area of the city's north end, the Market Square Boardwalk redevelopment, the Town of Grand Bay-Westfield Municipal Master Plan, and the Rockwood Park Lily Lake Pavilion entrance upgrades, to name a few.

In addition to consulting engineering, ADI Limited also offers architectural planning and design, urban and land use planning, and environmental services through a network of offices in Atlantic Canada and Alberta. ADI, one of Canada's 50 Best Managed Companies, is the largest New Brunswick-based architectural and engineering firm.
