Enerplan Announces New General Manager

MONCTON, NB (July 13, 2009) – Enerplan Consultants Ltd., a leading energy efficiency, energy performance company based in Moncton, announced today the appointment of J. Allan Giberson, P.Eng. as General Manager. Mr. Giberson has strong technical and management experience spanning decades. He replaces retiring founder Kirk Bavis, P.Eng., who will remain during a transition period.

Al Giberson comes to the Enerplan team from ADI International Inc., a design-build/construction management firm. Prior to that he worked for McCain Foods in Florenceville, NB. His background also includes positions on the board of the Association of Professional Engineers and Geoscientists of New Brunswick (President) and Engineers Canada, the national body of professional engineers in Canada.

“As a leader in energy management issues and strategic energy planning, I am confident the skills Al brings to Enerplan will assist us in providing further value to our customers,” stated Mr. Bavis. “The Enerplan team has consistently been a market leader, and we look forward to continued excellence with Al leading the way.”

Enerplan’s energy management services maximize the energy efficiency of industrial, commercial and institutional operations by providing solutions to reduce energy costs and simplify energy management issues. Its residential division provides services to optimize energy use and realize cost savings at the household level.
