ADI Group divests consulting engineering and architectural division ADI Limited joins national engineering firm Trow Global

FREDERICTON, NB (November 23, 2009) – ADI Group Inc., parent company of consulting engineering and architectural firm ADI Limited, announced today that it will be merging its consulting engineering, architectural and construction management services with that of Trow Global Holdings Inc. Trow, an international engineering and consulting firm based in Brampton, Ontario, will provide a wide network of opportunities for Fredericton-based ADI Limited.

Hollis Cole, CEO of the ADI group of companies, stated today, “There has been a growing trend of consolidation in the consulting engineering industry. While ADI Limited has done extremely well as an independent firm, we feel quite strongly that even more opportunities exist for them and their clients as part of an international network.”

Mr. Cole will remain CEO of ADI Group Inc. and its subsidiaries including ADI Systems Inc. and Geomembrane Technologies Inc. “Our commitment to remaining based in New Brunswick is strong and our relationship with the University of New Brunswick is intact. We have over sixty year’s connection to UNB and will continue to partner on research and development projects,” stated Mr. Cole.

About ADI Group Inc.

ADI began as an employee-owned company in 1945 and has grown steadily since. ADI Group Inc. provides design-build services, composting operations and through ADI Systems and Geomembrane Technologies is a leader in wastewater treatment solutions, energy recovery and geomembrane cover systems to industries and governments worldwide. Its staff have experience working on more than 170 projects in over 30 countries around the globe.

The company holds numerous patents in water and wastewater treatment processes that are incorporated as complete treatment systems or as separate packages. ADI also holds patents on geomembrane cover systems and hydrogen sulfide removal from gas streams. ADI Group has a long history of investing in research and development which will continue. Its collaboration with UNB is ongoing in the pursuit of future market-driven technologies. For the past six consecutive years ADI Group has been recognized with “Canada's 50 Best Managed Companies” award.

About ADI Systems Inc.

ADI Systems Inc. holds several patents and has developed proprietary technology to treat industrial wastewaters. Its systems are used in over 30 countries around the world for leaders in food processing, beverage, pulp and paper and dairy-related industries. ADI Systems has a successful track record for challenging industrial wastewater treatment and energy recovery projects delivered on a turn-key basis.

About Geomembrane Technologies Inc. (GTI)

Geomembrane Technologies Inc. is one of the world's leading companies offering custom-designed geomembrane covers and liners. GTI designs, fabricates, installs and maintains complete cover systems from its base in New Brunswick for sites around the world. Projects include floating, modular, suspended, structurally supported, and gas handling systems for municipal and industrial wastewater treatment plants. GTI also offers potable water covers.
